Mian Nauman Kabir
President
Lahore Chamber of Commerce & Industry (LCCI)

As president of Lahore Chamber of Commerce & Industry (LCCI), I take pride in welcoming all the exhibitors and visitors at 17th International Exhibition of Food & Beverage Processing Technologies. This international exhibition will be an amazing opportunity for all those involved in the fields of Food & Beverage Processing Packaging Technologies industry to expand and diversify their business in Pakistan.

Pakistan in technology is at growing stage and these exhibitions help to promote latest edge technologies from international and local exhibitors eventually gaining a lot of attention of visitors from all over Pakistan. These exhibitions bring together diversified exhibitors from all over the world to present and exchange ideas related to technology.

I want to congratulate M/S Pegasus Consultancy for organizing such shows which, offers you the business potential both in terms of quality and quantity. It is one place where you can make direct contact with your customers, key players and check out what your competitors are doing.

I sincerely hope that this exhibition will benefit all the exhibitors and visitors related to above stated industries and will attract more foreign investment in Pakistan.

I wish the exhibition great success.

Mr. Fazeel Asif Jah
Chairman
Punjab Board of Investment & Trade (PBIT)

As Chairman of Punjab Board of Investment & Trade (PBIT), I take pride in welcoming all the exhibitors and visitors to the 17th International Exhibition of Food & Beverage Processing Technologies at Expo Center Lahore.

Considering the growing need of machinery in food industry, we cannot deny the importance of these exhibitions. Not only locally but food market around the world is coming up with unique solutions and new technologies. If we want more foreign companies to invest in our country or if we want to import more food processing machinery, these exhibitions are perfect platform to buy and see international machinery and products.

Talking about Punjab Board of Investment & Trade (PBIT) we are a provincial trade and investment promotion agency established by the Government of Punjab in 2009. In today's global economy, trade and investment play an increasingly important role in generating means for transformative change. At PBIT, we strive to ensure that this transformative change is sustainable and more impactful.

Lastly, I would like to appreciate the efforts of organizers M/S. Pegasus Consultancy in bringing together local and international exhibitors under one roof. I wish you all the best for this expo and for all your future events & exhibitions.

Dr. Syed Hussain Abidi, S.I.

Chairman

Pakistan Council of Scientific & Industrial Research (PCSIR)

It is a great honor for me to extend my heartiest congratulations to the management and the team of M/s Pegasus Consultancy (Pvt.) Ltd., for organizing 17th International Exhibition of Food & Beverage Processing Technologies on 22-24 September 2022 at Expo Centre, Lahore. No doubt, M/s Pegasus Consultancy is committed to promote the local industry in achieving and maintaining the international level of quality of products for global competitiveness.

Research & Development in the fields of Science & Technology is at the heart of a knowledge society, which every person should aspire to be. A major part of our economic activity now lies with the so-called knowledge industries and services sector, which are primarily based on knowledge processes and products.

Pakistan Council of Scientific & Industrial Research (PCSIR) is one of the premier research and development organization of the country working under the umbrella of Federal Ministry of Science & Technology, Government of Pakistan. PCSIR has a network of 17 research laboratories/ units including training institutes located all over the country in Federal as well as all provincial capitals. Several laboratories of PCSIR are ISO 17025 accredited and some are under the accreditation process. The broad-based activities of the PCSIR encompass almost the entire industrial sector in the country. Besides R&D, the council's laboratories are providing testing & certification services to almost entire industrial sector and most of the exportable products are being tested/ certified by its ISO 17025 accredited laboratories. The thrust areas of PCSIR research touches nearly all the sectors of the economy including biotechnology, energy, food & food safety, advance and composite material, leather, textile, herbal medicines and values addition in products.

Keeping in view the applicability of Science & Technology in every sphere of human development, present Government is focusing on encouraging R&D organizations to undertake demand driven research and strengthen their linkages with the industry as well as the academia, with the objective of resolving industrial problems, developing new technologies & products, promoting innovation, commercialization and IP culture in the country.

It is hoped that these initiatives will lead to more productive research that will in turn generate employment opportunities for skilled manpower and create an environment for economic growth and cultural maturity.

Dr. Shehzad Amin
Chief Executive Officer
Pakistan Dairy Association

Pakistan Dairy Association acknowledges and appreciates the efforts of the Pegasus Consultancy for organizing the 17th Edition of International Exhibition of Food & Beverage Processing Packaging Technologies IFTECH Pakistan, scheduled from 22nd to 24th September 2022 at Expo Centre Lahore.

With the growing population, use of technology in processing and packaging of food is the only way forward to the future. If any food sector wishes to make exponential progress, right and effective incorporation of technology is the key. Dairy Sector is no different. Dairy Sector in Pakistan has been making use of technology for processing, packaging, quality assurance and quality control as well as research and development. However, the dairy industry is continuously exploring better options which can reduce time and resources and give maximum output possible. An exhibition like IFTECH Pakistan can prove to be quite a learning experience for the dairy industry of Pakistan, especially the entrepreneurs and SMEs. We hope that the exhibition will be a source of knowledge regarding innovative technology for the dairy sector of Pakistan. Dairy sector is one of the most important sectors of Pakistan which impacts more than 10 million families. The dairy industry is providing numerous safe and quality processed dairy products to the consumers such as UHT milk, Pasteurized milk, Flavored milk, Tea whitener, Dairy Drink, Ice Cream, Yogurt, Drinking yogurt, Desi Ghee, Cream & many more.

Pakistan Dairy Association is the representative body of dairy farmers, milk processors of the country and Dairy related businesses. It is our mission to ensure provision of Safe Milk to the population of Pakistan. More than ninety percent of the packaged dairy products sold in Pakistan are produced by our members. In addition to delivering safe and healthy dairy products to the consumers, PDA members are providing livelihood to millions of milk farming communities and key contributor to national tax revenue.

We, at Pakistan Dairy Association, wish the Pegasus Consultancy good luck and look forward to the exhibition.

Mr. Ahmad Shafiq
CEO, COTHM Pakistan & Dubai
Secretary General, Chefs' Association of Pakistan (CAP)

The upcoming International Exhibition for Food & Beverages Processing Packaging Technologies, 22-24 September, 2022 will showcase a vast array of technology related to the food and beverage packaging industry. College of Tourism & Hotel Management (COTHM), Pakistan and Dubai and Chefs' Association of Pakistan (CAP) are proud being a part of the esteemed event. I am delighted to extend felicitations to the management of Pegasus Consultancy (Pvt.) Ltd. The event has carried on through recent years, established consumer and exhibitor trust, alongside gaining national and international acclaim.

Henceforth, in my opinion, IFTECH 2022 will undeniably prove to be a catalyst in frosting international interest in Pakistan's culinary and hospitality industry, and providing a great impetus to the growth and development of the hospitality industry in Pakistan.

Mr. Aasim A. Siddiqui
Chairman
Pegasus Consultancy Pvt. Ltd.

I am pleased to welcome the participating companies and distinguished guests at the 17th Edition of IFTECH PAKISTAN.

Pegasus Consultancy has been consecutively organizing these events for the past 19 years providing congenial and stimulating opportunities of business matchmaking and bilateral trade for local and international companies. I am proud to state that through our continuous efforts, IFTECH is now considered as the annual meeting place in Pakistan for local and international brand owners and industry professionals.

We firmly believe that Pakistan is a progressive and key growth market of South Asian region having unprecedented business prospects in Food Processing and packaging. Pakistan has got all the right elements which combines to offer a promising growth for investors in these industries. Packaging has progressed much further into providing high barrier safety for food and beverages.

Food and beverage is the 2nd largest industry of Pakistan and this is the fastest growing sector of our economy. It will be interesting to know that as per the recent research, the global processed food market will be worth \$7,036.14 billion in 2026. Over the past few years, consumer propensities have rapidly changed. People are more concerned of food safety, hygiene and convenience. Hyper markets and internet sales have changed the dynamics of retail business therefore the need of active and intelligent food packaging with high shelf life and shelf appeal is in high demand.

In the given scenario, I hope the local industry will take full advantage of IFTECH by exhibiting products and services and visiting to quantify final purchase decisions.

In the end I wish to offer my sincere thanks to all exhibitors, visitors, buyers, industry professionals, media partners and supporting trade bodies. I hope our efforts will be well appreciated and encouraged by industry's wholehearted participation in IFTECH PAKISTAN 2022.

Mr. Aamer Khanzada
Managing Director
Pegasus Consultancy Pvt. Ltd.

On behalf of Pegasus Consultancy, it is my great pleasure to welcome the 200 companies from 20 countries and their representatives who are taking active part in our exhibition; IFTECH 2022 at the Expo Centre Lahore.

This event has come a long way to be recognized as the most effective B2B exhibition marketplace for business interaction in food & beverage processing industries. Our continued success in organizing these events is a direct result of untiring support and encouragement; which we received from local and international exhibitors

Over the past 16 years, numerous new technologies have been displayed at IFTECH, out of which, many have been inducted in to the manufacturing value chains in Pakistan. Traditionally, the success of this event are gauged by the novelty of innovations at display, presence of local and global power players and the number of purchases and cooperation agreements signed during three days of the exhibitions. I am honored to say that Pegasus exhibitions have the highest retainer ship of clients which is reflected through our successive growth.

In the food and beverage sector, Pakistan is the 4th largest milk producing country in the world and 11th largest in poultry production. The livestock sector during the period from July-June 2021-22, agriculture machinery and implements valuing \$112.025 million as against the imports of \$84.679 million of same period last year. Thus, reflecting the sustained growth and stability in the economy of Pakistan.

I am thankful to the cooperation extended to us by the good office of Lahore Chamber of Commerce & Industry, Pakistan Council of Scientific & Industrial Research, Salt Manufacturers Association of Pakistan, Pakistan Dairy Association, College of Tourism & Hotel Management, Chef's Association of Pakistan and Pakistan Agriculture Research Council.

At the end I would like to congratulate IFTECH team and hope their efforts will bring positive results for the visitors and exhibitors of IFTECH PAKISTAN 2022.

Since 2008, **Food Links International** has envisioned the intersection of nature and industry and has brought it on ground by supplying Natural and Nature-identical food flavors, colors and ingredients.

Food Links International takes pride for being a pioneer in the supply of food additives for over a decade. It is with immense pleasure that Food Links International has now introduced its own brand with the name of **Dulzer** – Quality Leads.

Dulzer being a spear head of the food additives industry intends to have a twofold approach: to provide top quality products combined with exceptional customer satisfaction.

The main motto that encapsulates our brand is 'better ingredients, better products', and this motto aspires diversification in our business by providing us with multitudes of opportunity to collaborate with organizations in Pakistan and receive inter-organizational support within Pakistan and around the world.

Dulzer as a brand is deep rooted in not only selling its products but also upholds and markets its top-notch values. **Dulzer** provides, one stop solution, by providing multiple product lines and each product line has its own purpose and vision.

As a company we respect and adhere to the corporate social responsibilities, and we make sure our products are eco-friendly.

Food Links International complies with all the modern regulatory requirements and certifications, including ISO, HALAL, HACCP, Health and Kosher certification, to assure safety and premium quality.

Our well-established business connections, unparalleled professionalism and tailor-made skills have made us one of the most renowned companies the food industry.

We are SMC – leading Pakistani manufacturer of flavours & fragrances, committed to developing high quality flavours & fragrances with more than 100 years of experience in the industry.

Tracing its roots to Pre-Partition India, SMC has been combining the experience passed down from one generation to another with modern technologies to deliver the best sensorial experience.

Our commitment to excellence is backed by our love for food that tastes great and fragrance that leave a signature impact.

Passionate Creativity

SMC never compromises on quality materials, and always open to test new ingredients & technological developments to keep abreast with emerging trends and needs. SMC looks at flavours and fragrances as a total solution that should be the winning addition to our customer's product. To accomplish this, SMC hires people based on their creative & solution oriented capabilities. This ensures that our team will never hesitate to go extra mile to put a smile on your face.
